

Ways to Succeed in Miss Browne's Class

Read!

If reading is assigned I promise it is for your own good! Reading the section in the book before I teach it will help to enforce the lesson which will help you learn it better and faster.

Ask Questions!

I do not believe in stupid questions, and I will try to answer any science questions you have. When in doubt, raise your hand.

Take notes!

Writing down notes will not only help you pass notebook checks, but it will reinforce the material. Plus, you will be able to go back later and study them.

Stay organized!

Keeping your notes and binder in order will be part of your grade, but even more valuable is the fact that you will be able to find the notes you need faster if they are in order.

Care!

I care about you and I want you to succeed. It is my goal to get you to love science or at least pass my class. If you need anything to help you succeed let me know!

Remember, I am here for you!
